SKILLS

- Kotlin
- Java
- Jetpack Compose
- XML
- Firebase
- SQLite
- Testing & Debugging
- Git
- Github
- Google APIs
- Google Play Console

TOOLS

- Android Studio
- VS Code
- Postman

PROFILE

Experienced Android Developer with expertise in designing, developing, testing, and maintaining mobile applications using Kotlin and Java, skilled in API integration, UI/UX optimization, and bug fixing, with experience collaborating in cross-functional teams to deliver production-ready apps on Play Store.

WORK EXPERIENCE

Fanawar IT (Private) Limited

2025 - PRESENT

Android Developer

- Engineered and maintained high-performance Android applications (Keyboard & Translator apps) using Kotlin & compose, modern architectural patterns (MVVM, clean architecture).
- Integrated and managed RESTful APIs with efficient data handling, caching strategies, and offline-first support to ensure seamless user experience.
- Implemented Google AdMob monetization, including ad lifecycle management and event tracking, resulting in improved revenue generation and user engagement.
- Enhanced and maintained responsive, user-friendly UI/UX, ensuring compatibility across diverse Android devices and screen sizes.
- Collaborated with cross-functional teams to debug, test, and fix bugs,

Mega Minds Studio

2019-2025

Android Developer

- Developed and maintained Android applications using Java and Kotlin, ensuring scalable, maintainable, and efficient codebases.
- Collaborated with cross-functional teams to design and deliver mobile applications aligned with business and user requirements.
- Integrated Google Maps API and Firebase Cloud Messaging (FCM) to enhance app functionality and real-time user communication.
- Enhanced responsive UI/UX ensuring compatibility across a wide range of Android devices and screen sizes.
- Demonstrated strong experience in building, testing, and deploying Android applications with deep understanding of Android native components and Google Play Services.

Top Edge Technology

2017-2019

Junior Android Developer

- Developed and maintained mobile applications using Java language.
- Experience working as a native mobile engineer on a publically-released application.
- Implemented RESTful APIs and third-party libraries to enhance application functionality.

EDUCATION

2013 - 2017

BZU MULTAN, PAKISTAN

- BSc Computer Engineering

2011 - 2013

MISALI H.S.S MUZAFFARGARH

- Intermediate

LANGUAGES

- English
- Urdu

PROJECTS

• Multilingual Keyboard

- Developed and maintained multiple keyboard Android applications with features like offline support, next-word prediction, enhanced UI/UX, and continuous bug fixes for improved usability and performance.
- Integrated AdMob monetization, Firebase services, and analytics tracking, ensuring stable releases, active maintenance, and improved user engagement across live apps.
